

Monroe/Charlotte Metro Area Services

Botox Cosmetic and Dysport:

FDA approved prescription medicine that is injected into muscles and used to improve the look of moderate to severe frown lines and wrinkles between the eyebrows. Other areas that can be treated are the forehead, crow's feet and the top lip. This treatment is indicated for ages 21 to 65 years of age. The medication is injected with a fine needle, is virtually painless, and dramatic effects are visible within 3-10 days and will last 2 ½ to 4 months. Visit Botox.com and Dysport.com. **\$9/unit**

Botox Therapeutic for hyperhidrosis:

Hyperhidrosis is excessive sweating and can be greatly reduced with Botox treatments in the arm pits. Treatment helps control the symptoms of severe underarm sweating when topical medicines do not work well enough by temporarily blocking the chemical signals from the nerves that stimulate the sweat glands. When the sweat glands don't receive chemical signals, the severe sweating is greatly reduced. Botox injections are expected to temporarily stop the production of excessive sweat in the treated areas only. Sweat continues to be produced elsewhere. Results can last 6 to 7 months. This is an FDA approved procedure. **\$750**

Microdermabrasion:

This is the least invasive dermatological procedure. It is a painless procedure that helps your skin look younger, healthy and glowing. After one treatment your face will feel softer and appear revitalized. For optimal results you should treat yourself to microdermabrasion every three to six weeks. Minimal redness can be expected for one hour to one day after (for some there is no redness). **\$40/session or 3 for \$100**

Latisse:

Latisse is an actual growth treatment that is FDA approved to clinically grow eyelashes. It is only available by prescription. Latisse is a once a day treatment applied to the base of your upper eyelashes. More length may be seen in as little as 4 weeks and full growth is achieved in 16 weeks. The product grows lashes longer, fuller, and darker. **\$90/kit**

Obagi:

Obagi has developed clinically proven skin health products primarily for the dermatology and plastic surgery markets. The company's products are designed to improve penetration of prescription and cosmetic agents across the skin barrier for skin conditions such as premature aging, hyperpigmentation, acne, sun damage, rosacea as well as fine lines. Amazing results! 20-25% off retail prices. A price list can be mailed to you upon request.

Obagi Blue Radiance Peel:

This very light, superficial peel can improve your skin's look, texture and feel in a matter of minutes. It provides instant radiance—tighter, smoother, brighter looking skin after just one use. A series of 4 to 6 peels provides best overall results. This peel provides superficial exfoliation, with little to no downtime. Some will have minimal dryness, tightness and flaking for 1-3 days (most don't). This peel can be combined with a microdermabrasion treatment for slightly deeper results. **\$65 or 3 for \$180**

Obagi Blue Radiance Peel with microdermabrasion \$100 or 3 for \$280

VI Peel:

The VI Peel contains a synergistic blend of powerful ingredients suitable for most all skin types. You see dramatic results with virtually no discomfort and little downtime. This peel will improve the tone, texture and clarity of your skin, reduce age spots, freckles, and hyperpigmentation, including melasma. It improves acne, fine lines and stimulates collagen for firmer more youthful skin. This is a medium depth peel with visible results after only one peel. There is redness, tightness, dryness and peeling for two to five days following. **\$210 or package of 3 for \$600**

*****one time only/first time only introductory special on this peel is \$150*****

Dermal Fillers: From smile lines to vertical lip lines, you can smooth away unwanted wrinkles and restore natural contours. With just one treatment, you'll get smooth and natural-looking results that can last up to a year. **\$450/syringe or \$850 for two**
